

RSGB Band Plan (effective from 1st January 2024)

The following band plan is largely based on that agreed at IARU Region 1 General Conferences with some local differences on frequencies above 430 MHz.

134 GHz (2mm) IARU Recommendation	UK Usage
134,000-134,928 MHz All modes	134,256 / 134,400 MHz - UK centre of activity IARU Region-1 preferred centre of activity
134,928-134,930 Narrowband modes	
134,930 -136,000 All modes	
136,000 -141,000 All modes	
LICENCE NOTES: 134,000-136,000 MHz Amateur Service and Amateur Satellite Service - Primary User . 136,000-141,000 MHz Amateur Service and Amateur Satellite Service - Secondary User . Note specific conditions apply within 50 km of SK985640 (Waddington) and SE202577 (Harrogate).	

Notes to the Band Plan

ITU-R Recommendation SM.328 (extract)

Necessary bandwidth: For a given class of emission, the width of the frequency band which is just sufficient to ensure the transmission of information at the rate and with the quality required under specified conditions.

The use of Amplitude Modulation (AM) is acceptable in the all modes segments but users are asked to consider adjacent channel activity when selecting operating frequencies.
